Professional Summary

Business Analyst with strong expertise in Microsoft Excel, SQL, Power BI, Python, and Business Intelligence. Skilled in requirements analysis, data validation, KPI tracking, business process analysis, and interactive dashboard development. Experienced in identifying trends, anomalies, and operational bottlenecks to provide actionable insights, improve business processes, and support data-driven decision-making.

Core Skills

Reporting & Analysis: KPI Reporting, Performance Monitoring, Trend Analysis, Data Validation, Root Cause Analysis

Business Intelligence: Power BI, DAX, Power Query, Data Modeling, KPI Dashboards, Interactive Reporting

Technical Tools: Microsoft Excel (Advanced, Pivot Tables/Charts, XLOOKUP, INDEX-MATCH), SQL, Python (Pandas, NumPy)

Operational Competencies: Data Cleaning, ETL, Process Improvement, Anomaly Detection, Cross-Team Collaboration

Project Experience

Employee Performance & KPI Reporting Dashboard

Microsoft Excel

- Built an interactive performance tracking dashboard in Excel to monitor employee productivity, attendance, and department KPIs.
- Standardized raw records using XLOOKUP, INDEX-MATCH, and data validation techniques to improve reporting accuracy.
- Developed dynamic Pivot Tables, summary KPI cards, and trend charts to highlight operational bottlenecks for management review.
- **Tools:** Advanced Excel, Pivot Tables/Charts, XLOOKUP, INDEX-MATCH, Conditional Formatting, Data Validation

Hospital Management Reporting Dashboard

Power BI

- Developed an analytical dashboard tracking patient demographics, admission trends, billing, and key clinical metrics.
- Transformed unstructured patient data using Power Query and constructed custom DAX measures for operational KPIs.
- Configured interactive visual features, including slicers, drill-through pages, and bookmarks, to streamline executive insights.
- **Tools:** Power BI, DAX, Power Query, Data Modeling, Data Visualization

Smoking & Health Risk Analysis Dashboard

Power BI [GitHub]

- Designed a Power BI report analyzing correlation patterns between smoking behavior and key health indicators (BMI, BP, Cholesterol).
- Modeled health datasets to identify risk clusters across demographic groups using tailored DAX functions and trend visualizations.
- **Tools:** Power BI, DAX, Power Query, Data Visualization

Education

ACE Engineering College

Bachelor of Technology in Computer Science (Data Science)

Hyderabad, India

2023 – 2026

SVS Polytechnic College

Diploma in Electronics & Communication Engineering

Warangal, Telangana

2020 – 2023
